Experience

Entropy - Sales Engineer & Product Manager | Mar. 2026 - Present | Argentina | Hybrid

- Acted as the primary point of contact for stakeholder management, successfully controlling project scope and client expectations.
- Translated business requirements into user stories and continuously prioritized the product backlog to align with strategic goals.
- Defined product roadmaps and milestones, providing agile supervision of sprints to ensure on-time delivery.
- Developed strategic documentation, including technical requirements, commercial proposals, user manuals, and status reports.

Adecco - Continuous Improvement Intern | Mar. 2025 - Present | Argentina | Hybrid

Responsibilities:

- Analyzed key performance indicators (KPIs) to identify process bottlenecks, proposing solutions that have improved operational workflow efficiency.
- Designed and deployed automation workflows using Microsoft Power Automate and n8n, significantly reducing time spent on manual administrative tasks.
- Collaborated in strategic meetings by providing data-driven analysis to support team decision-making.
- Documented and standardized procedures to ensure process consistency and quality.

INMO - Full-Stack Web Developer | Mar. 2022 - Dec. 2022 | Argentina | Hybrid

- Developed a real estate management platform, leading the front-end implementation with React.js and Next.js to build an intuitive and responsive user interface.
- Implemented user authentication and real-time data management by integrating with Firebase (Authentication and Firestore).
- Managed the complete project lifecycle using JIRA for sprint planning and task tracking, ensuring the timely delivery of key features.

Technical Skills

- **Programming Languages & Architecture:** C | C++ | C# | Python | Java | JavaScript | React Native | Object-Oriented Programming (OOP) | Layered Programming | LINQ | ASP.NET | HTML | CSS.
- **Project Management & Methodologies:** Agile Methodologies (Scrum & Kanban) | Waterfall | Rational Unified Process (RUP) | Risk & Stakeholder Management | JIRA, Asana, Trello, Microsoft Planner.
- **Databases & Business Intelligence (BI):** DML & DDL in SQL Server | Firebase | MariaDB | Microsoft Power BI | Power Query.
- **Workflow Automation:** Microsoft Power Automate | n8n.
- **Applied Artificial Intelligence:** Large Language Models (LLMs) | Prompt Engineering (Chain of Thought, Zero/Few-Shot) | RAG Architecture (Retrieval-Augmented Generation) | AI Automation & Augmentation | Responsible AI & Bias Mitigation.
